

For Immediate Release

codeMantra, LLC a national provider of wholesale cost efficient litigation support solutions introduces cP-DocRev. An alternative, wholesome web based review tool.

cP-DocRev offers industry standard applications. Built on a .net framework and SQL backend, offers an easy-to-use interface, outputs to most standard 3rd party production tools with the necessary business features. The platform helps law firms and corporations manage, review, archive, and distribute electronic documents. Delivered as a hosted, web-based platform, with no software to download, upgrades to purchase or special connections to configure. Centralized web-based system, allows collaboration with other offices.

The platform is easy to use, the technology and pricing is straight forward. A flexible solution with the ability to define and lock down features to ensure effective and efficient document management, review, archival, and distribution.

"The value of cP-DocRev is the lower cost of ownership, ease of use and flexibility," said Robert Grande, Senior Business Development Manager, codeMantra. "In today's legal environment, law firms simply can't afford to waste time and overhead with complicated, expensive document solutions. cP-DocRev with its simple to use interface helps teams to get up and running quickly, more easily share and manage information, finish document review and production more efficiently and effectively."
